| Hastings III. | ... — | Dengate | | | |

THE FIELD OFFICER.

"Go straight for Souls, and go for the worst."—THE GENERAL.

No. 4.]

APRIL, 1904.

[Vol. 12.]

THE CONGRESS.

THE importance of the coming International Congress to the Field Officer can scarcely be over-estimated. It cannot be measured by any similar gathering in the past. The Army is in a stronger position to-day than even the most sanguine Officer of ten years ago anticipated to find it in such a lapse of time. It has undertaken responsibilities that were, at the last Congress, but dimly foreshadowed, and developed its resources, especially its local talent, to a marvellous degree. Take but one instance alone of this development. The idea of a Corps Cadet had not, we think, entered the mind of The General. We were groping for light as to how to increase the responsibilities of our Local Officers, while such projects as Emigration and Colonies for Drunkards and Vagrants and Criminals were banished to the far-distant time. But here we are bounding we know not whither, and with the

beckoning hands of State and local authorities inviting us to take up the work of reformation in which they have failed. We could also enlarge upon the growth of The Army's influence in the press, the street, the slum, and the pub, a factor which will compel us, from time to time, to multiply our agencies in every branch of our spiritual and social work.

We have thus travelled a long way since 1894. The horizon of that year is the centre of our movement to-day. And just as then some of us were dazzled by the prospect and humbled before the Lord that we should be among the chosen to go forward and possess the land, so to-day we are lost in wonder, love, and praise. We cannot adequately estimate the possibilities of the future by the accomplishments of the past.

Then the character of the Congress gathering cannot be compared with any similar event in history. The
